Gentle Morning Movement

Start seated

Sit on the edge of the bed or on a chair before you stand. If mornings make you dizzy, stay seated and mention that to a clinician. This sequence is not a treatment for blood pressure or for sleep.

Stop if something hurts, makes you dizzy, or does not fit a limit from your clinician. This is education, not a personal exercise plan.

- Ankle circles, one foot at a time.
- Shoulder rolls, small and slow.
- An easy reach with one arm, then the other.
- Stand only if you feel steady, and hold the bed or the chair.
- Walk to a window, or march while seated.
- Finish with one minute of ordinary breathing.
