Gut Health Basics

Food first, not a product

Digestion depends on many things, including what you eat, how fast you change it, stress, illness, and medicines. There is no perfect gut pattern on this page. People differ.
The Nutrition section is the place for the longer explanation, food photos, and the optional seven-day notes. This guide is the short version.

Three everyday foods

Oats, beans, and plain yogurt with live cultures are ordinary foods. Oats and beans bring fiber. Plain yogurt is a fermented milk food. Read the Added Sugars line if the yogurt is flavored. None of these is a treatment, and none guarantees comfort.

- Oats: cook them as you already do, and add fruit if you want
- Beans: rinse canned beans if you want less sodium, and increase the portion slowly
- Plain yogurt: look for live cultures, and skip it if dairy does not suit you

When to talk with a clinician

Bleeding, trouble swallowing, ongoing pain, or a change that worries you belongs with a qualified clinician. This page cannot tell you the cause, and it does not diagnose any condition.

Educational only. lifeZoi does not diagnose, treat, or promise a result.
It does not promise a longer life.
